Summary

My passion for software development is fueled by my commitment to creating innovative solutions and improving product development.

My journey through a career change, nourished by a deep passion for technology and a dedication to lifelong learning, has led me to specialize in React, Next.js, JavaScript, and various other technologies, marking a significant evolution on my professional path.

I am constantly exploring different technologies and tools to expand my skill set, contributing significantly to both personal and open-source projects.

My past experiences have endowed me with a profound understanding of teamwork and the skill to successfully complete projects within deadlines. With a clear vision of becoming a full-stack developer, I am resolute in my commitment to continuous learning and self-improvement.

Tech Skills

JavaScript | TypeScript | React.js | Next.js | Redux.js | Vue.js | Tailwind CSS | SASS | Git | REST API
Statamic CMS | Antlers | Firebase | Figma | Vite | HTML5 | CSS3 | React Testing Library | Jira

Projects

Time Tracker [🔗](#)

The "Time Tracker" project is a web application designed for time management and task tracking. It allows users to track the time spent on various tasks and maintain logs of their activities.

- **Secured user registration**, login, and logout functionalities were implemented using **Firestore Auth**.
- Instant updates were enabled in the application through **real-time data** synchronization with **Firestore**.
- **Time tracking features**, including start, pause, and stop functions, were implemented using **React.js**.
- A detailed **activity log management** system was designed using **React.js** and **Firestore**.
- **Protected routes** within the application were secured, ensuring authenticated access through **React Router**.
- **Form validation** and handling in the application were managed using **React Hook Form** integrated with **Zod**.
- **Responsive design** was achieved, ensuring a consistent user interface across various devices using **Tailwind CSS**.

GitHub [🔗](#)

Wordigo [🔗](#)

A platform where you can translate unfamiliar words while browsing the web with your browser, add them to your personal dictionary, and share them.

- Managed **tasks** and **workflow** within the team as **Development Manager**
- Developed the **product roadmap** by auditing **issues** to improve project efficiency.
- Developed **reusable UI components** and style templates.
- Implemented authentication and **OAuth2** structure using **Next.js**.
- Added **multi-language** support and implemented necessary **SEO** optimizations.

Professional Experience

Frontend Developer

Epigra [✉](#)

03/2023 – present

Remote

- Developed **high-performance, SEO-friendly** interactive web applications using **Next.js, React.js, and Vue.js** technologies. Centered on user experience, enhancing **site speed and accessibility**.
- Designed **dynamic** features that strengthen projects' **functionality** and **user interaction** using **JavaScript** and **TypeScript**. Applied efficient coding practices and performed **performance** improvements to increase applications' **speed** and **reliability**.
- Created **aesthetically** pleasing, **easy-to-use**, and fully **responsive** user interfaces using **Tailwind CSS**.
- Utilized **Figma** to transform designs into **pixel-perfect** code, ensuring all projects conform precisely to the intended **design aesthetics**.
- Developed **easy-to-manage** and **scalable content management** systems using **Statamic CMS**. Provided customized **solutions** to meet client needs and made content updates more **efficient**.
- Acted as an **effective** bridge between **multidisciplinary teams**, ensuring **projects** are delivered on time and to **high standards**. Utilized **cross-process** coordination and **communication** skills to **optimize** project flow.
- **Diagnosed** the customer requests
- Conducted **reviews** of fellow developers' **tasks** within the **development process**.
- **Refactored** the old components and functions for better **performance**.

Frontend Developer

Weblitious Ltd. (Contracted) [✉](#)

06/2022 – 09/2022

Remote

- Development **interactive** and **responsive** website using **TailwindCSS, SASS** and **JavaScript**
- Participated in activities to optimize **web performance**
- Worked closely with **design** and **development** teams to optimize **UX/UI** design.
- **Collaborated** on various **web projects** within a dynamic **team**

Operations Manager

KODA Network [✉](#)

03/2020 – 04/2022

Izmir, Turkey

- **Analyzed** complex data sets, provided **critical** insights influencing business decisions, and developed **strategies** to improve **financial** and **operational performance**.
- I carried out **financial control, audit** and **cash flow** management and **accounting operations** in an organised manner.
- **Restructured financial** organization and **processes**, successfully managing the **digitalization** of **administrative** and **financial** workflows.
- Kept up with **advertising** and **marketing** trends, **integrating** industry innovations into our **business processes**, thus gaining a **competitive** advantage.
- Standardized **project management** processes and utilized **monitoring** systems for **effective** project management.
- Determined the agency's annual and quarterly **growth targets**, effectively **managing** resources and teams to achieve these goals.

Previous Experience

- Continuously **improved** organizational processes throughout roles ranging from **Administrative** and **Accounting Specialist** to **Operations Manager**.
- Gained in-depth expertise in **digital transformation** and **workflow optimization**.
- Led **financial planning** and resource allocation, bolstering infrastructure with **e-transformation** and **digital archiving**.
- Established **strategic supplier relationships**, optimizing the **supply chain**.
- **Collaborated** with public institutions and **managed government incentives** to ensure smooth operations.
